

# Press >>>>>> Release <<<<<<<

Brussels, 25 March 2019

## EU Member States put bees at risk by failure to adopt a guidance designed to protect them from the harmful effects of pesticides

### ERRATUM

The previous version of this press release erroneously mentioned cyantraniliprole and chlorantraniliprole as being neonicotinoid insecticides while those 2 insecticides have a completely different mode of action than neonicotinoids. We apologize for this mistake.
