PIC Export Notifications - **Main principles**

- **Who:** each EU exporter of a PIC substance
 - for each importing country
 - irrespective of its foreseen use in the importing country
- **When:** before the export takes place
 - before the 1st export in each calendar year
 - 35 days before the first shipment is foreseen

Identity
of the PIC
substance, and
its concentration
if exported in a
mixture

Properties, hazards and
risks of the PIC substance

Precautionary measures
to reduce exposure /
emissions

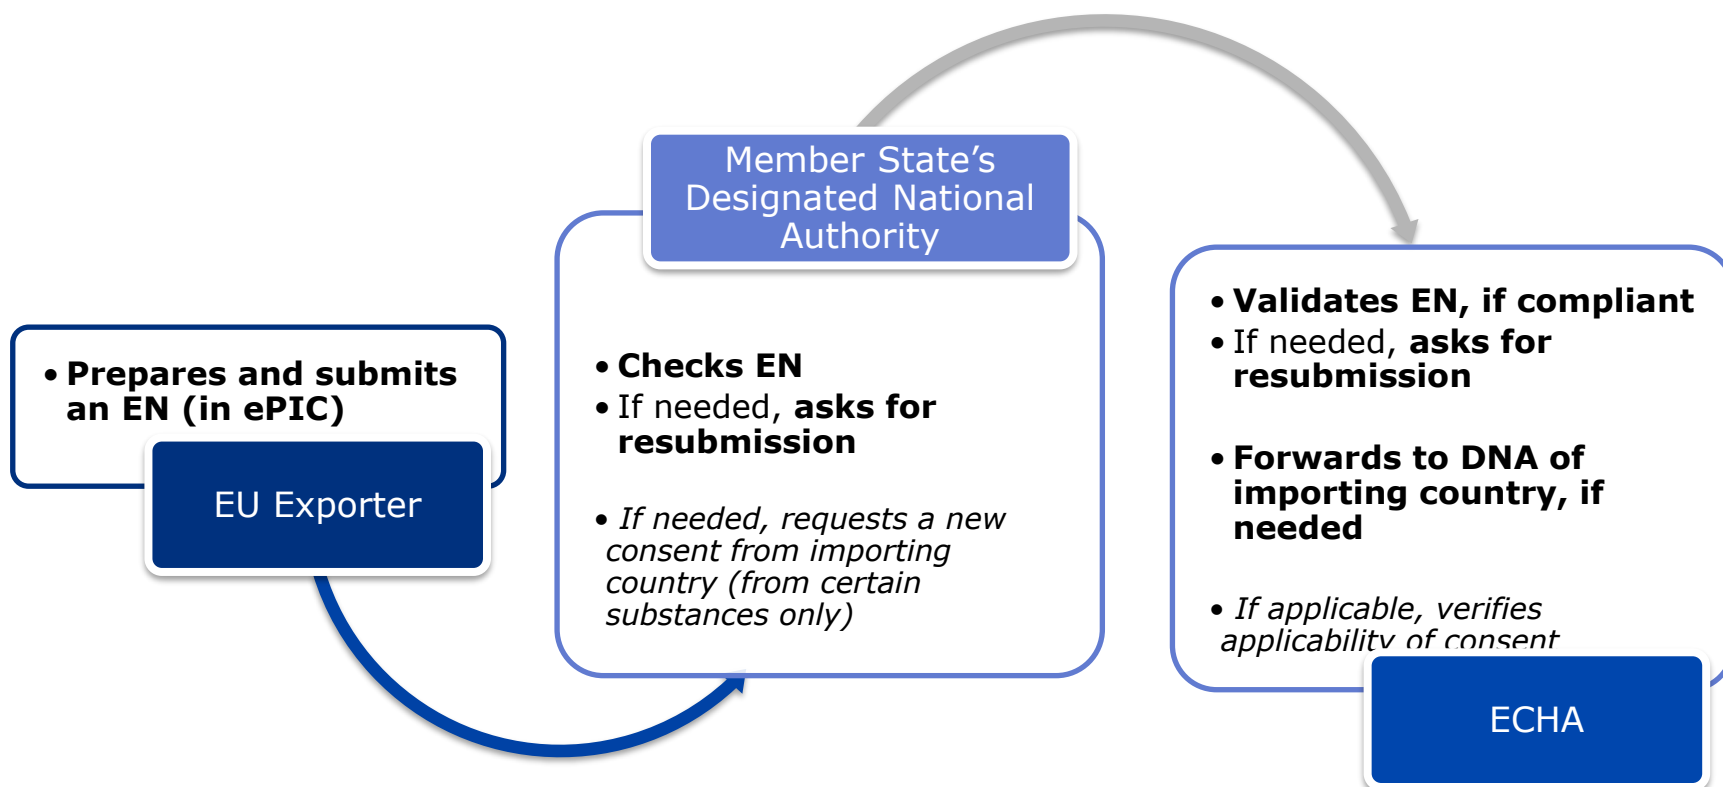

- the expected **date** of first export
- the expected **total yearly amount**
- the foreseen **use(s)** of the substance in the importing country
- the **contact details** of the importer(s)

The reasons for the substance to be listed under PIC, and the **EU regulatory status** of the substance

Annual reporting on PIC exports and imports

During the first quarter of each year, exporters and importers of PIC chemicals need to give their designated national authorities (DNAs) information regarding the exact quantities of the chemical (as a substance and as contained in articles or mixtures) shipped to or from each non-EU country during the preceding year. This is in accordance with Article 10 of Regulation (EU) 649/2012 and with Article 9 of the previous PIC regulations (Regulation (EC) No 304/2003 and Regulation (EC) No 689/2008)
