Stories from the European Green Capitals 2019, 2018
and 2015

City of Nijmegen – Netherlands // N.N. (tbc)

City of Oslo – Norway // N.N. Oslo representative (tbc)

City of Bristol – UK // Lucy VILARKIN, Sustainability Manager

Protecting nature through participative long-term planning
Town of Beauvechain – Belgium

Vincent BULTEAU, Environmental Advisor,

Reflection and words on exhibition:

Prof. Philip ACKERMAN, Green Mountain College, Vermont, USA

11:15 // COFFEE BREAK

Pop-up Show: **Toppling Goliath-Empowering grassroots movements: Mals** (outside the room)

11:45 // Panel Discussion: **How the citizens' demands for healthier, greener and resilient towns are taken up by leading city networks and initiatives**

Ana HUERTAS, Transition Network, Coordinator Municipalities in Transition

Dolores ROMANO, Ecologistas en Acción, Spain

Peter DEFRANCESCHI, Head of Brussels Office, ICLEI

Claudio SERAFINI, Director, Organic Cities European Network

Jitka BUSCOVA, Director, Healthy Cities of the Czech Republic Network (tbc)

Marcelline BONNEAU, Strategic Design Scenarios, VILCO - the Collaborative City

Final keynote:

Legislating for better health: Empowering local governments and citizen-driven activities for urban resilience

Nicolaas BEETS, Special Urban Envoy - Ministry of the Interior and Kingdom Relations, Netherlands

13:00 // SUSTAINABLE NETWORKING LUNCH

Moderation:

Cecília DELGADO, Architect and Urban Planner, Quercus - National Association for Nature Conservation, Portugal

Peter DEFRANCESCHI, Head of Office, ICLEI Brussels

**Pesticide
Action
Network**
Europe

European Economic and Social Committee

Organisers

Pesticide Action Network // PAN Europe works to eliminate dependency on chemical pesticides and to support safe sustainable pest control methods. PAN Europe brings together 40 consumer, public health, and environmental organisations, and women's groups from across Europe, together working to reduce the use of hazardous pesticides and have them replaced with ecologically sound alternatives.

Running **Pesticide Free Towns** Campaign since 2015, PAN Europe guides towns, showcases best practices, and is working towards a joined **European Network of Pesticide Free Towns**.

ICLEI - Local Governments for Sustainability

is a European and global network of over 1,500 cities, towns and regions committed to building a sustainable future. By helping the ICLEI Network to become sustainable, low-carbon, ecomobile, resilient, biodiverse, resource-efficient, healthy and happy, with a green economy and smart infrastructure, we impact over 25% of the global urban population.

www.iclei-europe.org

Partner

The Sustainable Development Observatory // SDO of the European Economic and Social Committee // EESC

facilitates dialogue and partnerships between civil society and EU institutions in the field of sustainable development by organising public hearings, conferences, platforms for exchanging good practices, as well as workshops and impact studies, and by contributing to Committee opinions. What is unique about the Sustainable Development Observatory is that it brings together people and organisations from a wide variety of interests and backgrounds that would otherwise seldom meet, in order to connect and explore new ways to address sustainable development issues.

Projects

Inno4sd is a network of networks about innovation in sustainable development.

The Global Network of Networks (Horizon2020 project) brings together networks dedicated to innovation for sustainable development with the aim of reducing fragmentation and supporting collaboration, whilst engaging policy-makers, research & development, and businesses to achieve the sustainable development goals.

→ Join a community of practice of advanced networks at profilenet.innovationseeds.eu if you are an action-oriented network interested in the practical application of solutions to stimulate transformative local change.

www.inno4sd.net

In order to enhance cities' capacity to resist, absorb and recover from the effects of climate change, the Horizon2020 project **Smart Mature Resilience // SMR** is developing standardized approaches and tools to support the development of climate adaptation and resilience strategies.

The project has engaged 3 partner cities (Kristiansand, Norway; Glasgow, United Kingdom and San Sebastian, Spain) in an iterative, pilot implementation process, addressing also an overall resilience building process and replicable integrated management system for resilience planning. Developing a co-creation approach has enabled to gather detailed information and understanding on what cities are expecting from this integrated management system for resilience, the so-called European Resilience Management Guideline.
